SUMMARY

Full Stack Developer with 3+ years of web-focused experience building systems for public and private organizations. I have been involved in the entire development process, from requirements gathering to deployment. I like creating high-impact solutions, always thinking about optimizing and improving processes for the future.

TECHNICAL SKILLS

Frontend	Angular, Next.js, TypeScript, JavaScript, PrimeNG, Angular Material, Tailwind CSS
Backend	PHP (Laravel, Slim 4), Golang, Python, REST APIs
Databases	PostgreSQL, MySQL, SQL
Tools	Azure DevOps, AWS, GitHub Actions

EXPERIENCE

Growing Network — *Full Stack Developer*

Bucaramanga · Dec 2024 – Present

- Develop and maintain mobility and transit modules handling an average of 40,000 transactions per month.
- Implement idempotency in tax payment processing, eliminating duplicate charges and reducing payment incidents by 20%.
- Optimize critical SQL queries and REST endpoints, cutting response times from 20 s to 200 ms – 2 s (up to 10× faster).
- Build financial modules for tax assessment and tracking, reducing manual corrections by 40%.
- Redesign user interfaces across 5 applications, reducing support tickets by 30%.

Stack: Laravel, Next.js, Angular, Python, SQL, REST APIs

CulturaSoft — *Full Stack Developer*

Bucaramanga · Apr 2023 – Aug 2024

- Developed REST APIs in PHP (Slim 4) and services in Golang for cultural management applications.
- Managed and optimized PostgreSQL and MySQL databases, improving performance under high concurrency by 70%.
- Built interfaces with PrimeNG, Angular Material, and Tailwind CSS, unifying the visual consistency of 3 applications.
- Managed the agile cycle in Azure DevOps: sprint planning, task tracking, and multidisciplinary collaboration.

Stack: PHP (Slim 4), Golang, Angular, PostgreSQL, MySQL, Azure DevOps

Asmet Salud EPS — *Data Analysis Documentation Assistant*

Bucaramanga · Nov 2021 – Aug 2022

- Migrated data from Excel spreadsheets to MySQL using SQL scripts, structuring hundreds of thousands of key records for operational use.
- Organized and maintained technical and operational documentation, ensuring information traceability.
